The Anni Azzurri Dorica Care Home is a modern facility with 129 beds combining residential hotel services, personal care and medical and nursing care.

The presence of qualified doctors and professionally trained technical assistants and nursing staff guarantees high levels of care and medical supervision. The Care Home has developed specific expertise in the care of people with psychogeriatric problems in senile dementia or Alzheimer's that are difficult to manage at home.

The Anni Azzurri Dorica Care Home is divided into 4 units for:

- **partially self-sufficient and non-self-sufficient elderly residents with physical, sensory or mixed pathologies.**
- **non-self-sufficient residents with dementia**
- people requiring **extensive rehabilitation**: with **physical and sensory disabilities**, in the immediate post-acute phase (also after hospital discharge).
- **a rehabilitation unit** providing a therapeutic plan in the form of continuous-cycle residential services for recovery from acute episodes or injured or impaired functions. Maximum length of stay is 60 days, which can then be extended for a further 60. At the end of rehabilitation treatment, residents either return home or are transferred to another type of residential facility, depending on their condition.

Health services

Each resident in the Anni Azzurri Dorica Care Home is cared for by a multi-professional team on the basis of an Individual Assistance Plan (PAI), which is drawn up in collaboration with family members and can be adapted to any changes.

In addition to daily and specialist medical assistance and 24/7 nursing, the Anni Azzurri Dorica Care Home provides various kinds of health services that include: post-hospitalisation, physiotherapy, podiatry, psychological assistance and pharmaceutical.

It also has two Protected Units for people with dementia and a Rehab Unit for those needing extensive rehabilitation.

The Anni Azzurri Dorica Care Home daily rate varies according to each resident's characteristics (degree of self-sufficiency), their clinical condition (intensity of care needed for their state of health), required hotel accommodation required, length of stay and any applicable National Health contributions.
